DETAILED ACTION

Allowable Subject Matter

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites a hybrid fuel cell system containing a turbine upstream of the cathode, wherein a bypass assembly segments the turbine outlet stream into two portions, the second portion being excluded from the fuel cell. Ghezel-Ayagh et al (U.S. Patent 6,365,290) and Steinfeld et al (*IECEC*, 1996) represent the closest prior art to this subject matter. Ghezel-Ayagh et al. discloses all the elements of claim 1 except the bypass assembly. Steinfeld et al. discloses a system having two streams leading from the turbine output, but both streams eventually lead back to the fuel cell and are thus not "excluded from the fuel cell" as required by claim 1. Furthermore, Applicants have included comparative data in the instant specification comparing the claimed system to that of Ghezel-Ayagh et al. This data shows a clear improvement in the claimed system. As such, neither Ghezel-Ayagh et al. nor Steinfeld et al., taken singly or in combination, is believed to fairly suggest the subject matter of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
